Levine, James A.

**Move a little, lose a lot**

Obesity specialist Dr. Levine says America suffers from "sitting disease"--the age of electronics has left us less active, by up to 2000 daily calories, than we were thirty years ago. What we need, he says, is to get moving, or nonexercise activity thermogenesis (NEAT). NEAT is as simple as standing, turning, and bending. Research shows that daily NEAT activity burns more calories than an hour on a treadmill, and can boost metabolism, lower blood pressure, and increase mental clarity.

Many died on the Asaka Maru, which was torpedoed, and the Hakasan Maru, the second grim hellship that took on survivors. Many more POWs did not survive the freezing Japanese winter of 1944/45. Yet John survived all these traumatic events and his chronicle makes a humbling and unforgettable book.
